

ORCHESTRAL STRINGS SILK COLOR CHART

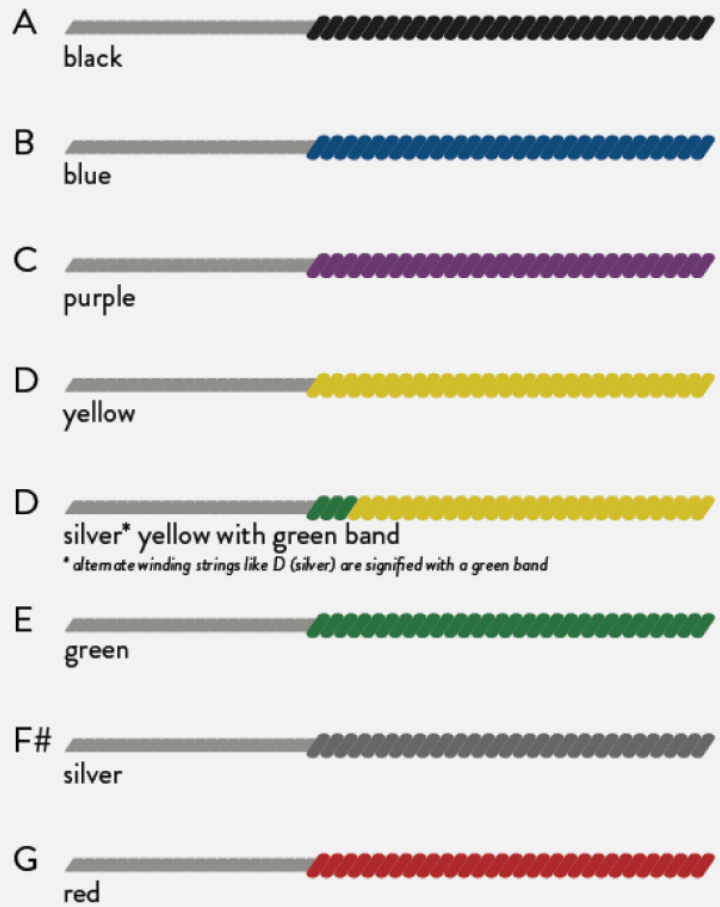

The Orchestral Strings Silk Color Chart displays the colors we use to identify different strings across different sets and instruments, as well as different tensions. This chart covers all tensions and pitches found on violin, viola, cello, and bass across our string lines, including Prelude, Ascenté, Kaplan, Pro-Arté, Helicore, and Zyex.

PEG END TENSION & PITCH

Closest to the peg end of the string, you'll find silk which indicates the strings pitch. The small bit of silk that's closer to the bridge indicates the tension of the string.

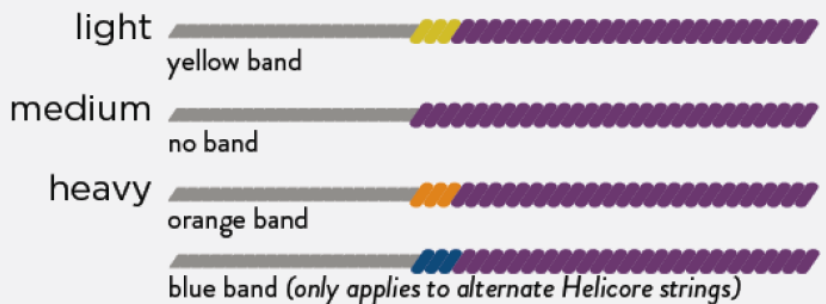

PEG END

Silking color depicts string pitch

TENSION

Example depicts light (yellow), medium, and heavy (orange) tensions for all instruments

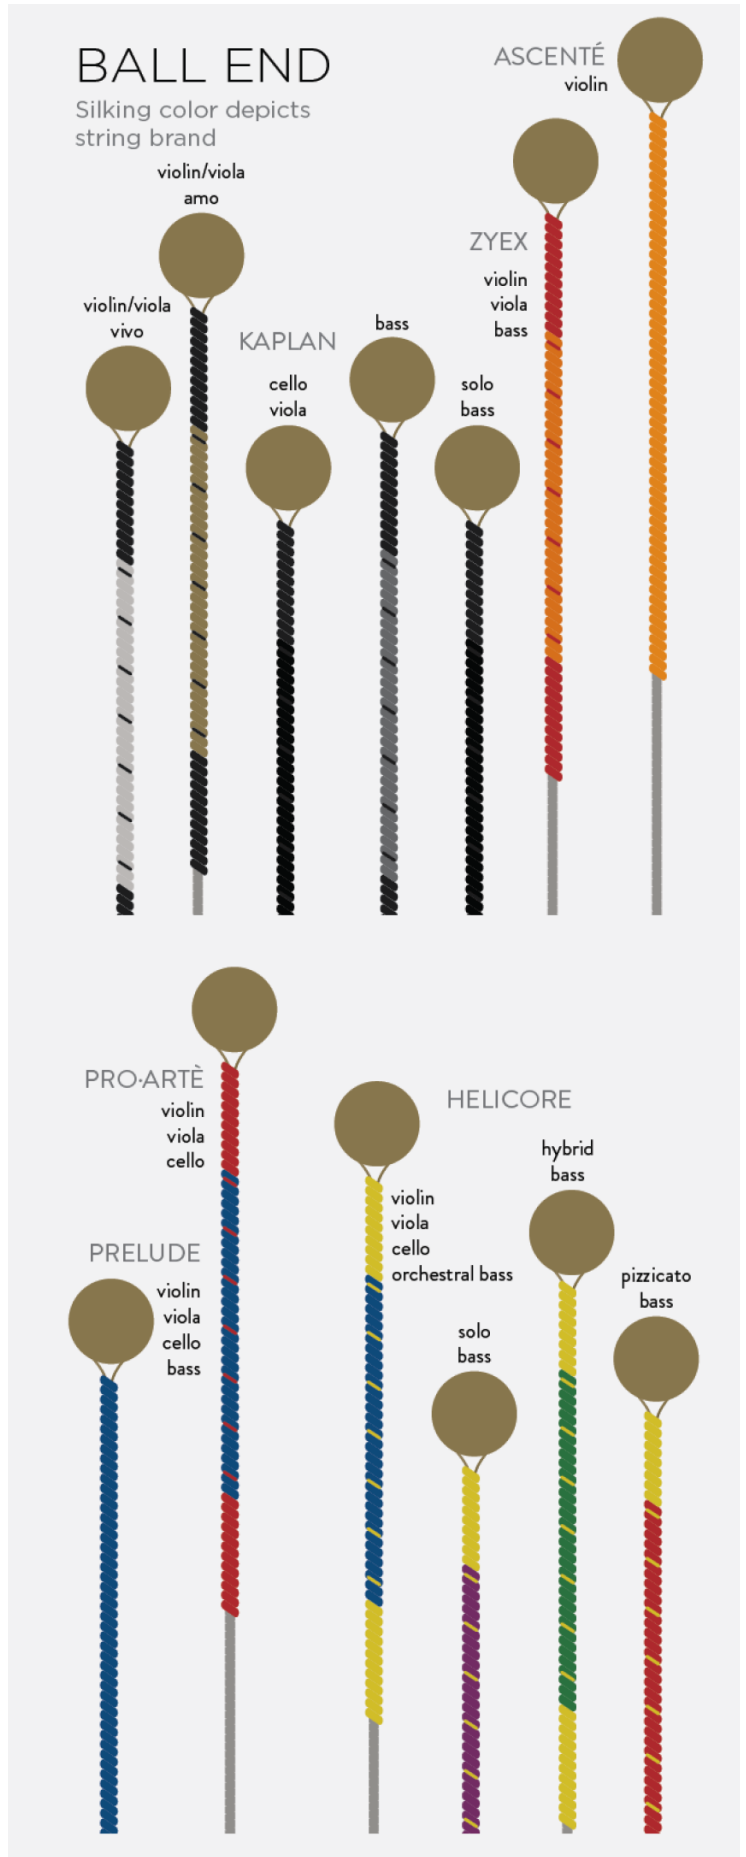

D'Addario

BALL END (BRAND)

The silk at the ball end of the string is uniquely colored for each D'Addario
Orchestral string brand.
