

Hydro-Jet S1

Water-Jet Cleaning System for Brass Instruments

The Hydro-Jet S1 allows you to safely and effectively clean your instrument with the focused power of water. The cleaning hose is fitted with a special spray nozzle that provides six highly focused and powerful jets of water to blast away accumulated foreign matter. Even the most difficult-to-reach parts of your instrument are easily cleaned by the Hydro-Jet S1.

The Hydro-Jet S1 is very easy to use. It is conveniently fitted with a 1/2" threaded adapter that attaches to any standard shower hose. Simply replace the hand-held shower head with the Hydro-Jet S1, and within minutes you will be powering away contaminants from deep inside your instrument.

- Easily attaches to all common shower hoses.
- High-powered water jet cleaning through innovative nozzle technology.
- Flexible cleaning wand to reach deep inside your instrument.
- Safely and effectively removes contamination.

Detach the hand-held shower head from the shower hose.

Attach the Hydro-Jet S1 to the shower hose and tighten securely.

Insert the blue cleaning hose into your instrument. You may insert the hose via the mouthpiece receiver or the bell. You may also detach the slides and clean them separately.

Turn on the water and adjust the temperature as desired. The innovative nozzle technology delivers highly focused and powerful jets of water for quick and easy cleaning of your instrument.

Slowly move the hose through each part of the instrument allowing the Hydro-Jet to work its magic.
