

“ wherever the gig is,
we’ve got you covered ”

PROTECTIONracket

"its all about the music"

Mark Richardson
Skunk/Anasie

Let's face it, you're reading this brochure because at some point in your life, you made the momentous decision to become a musician. It wasn't enough to listen you had to be a part of to make & create music.

Everyone at Protection Racket is involved in music, we are just like you! Dean is a drummer, Deans son Charlie is a drummer and plays guitar. Tommy is a guitarist and singer, Tommy's son Ryan is a drummer. Nick is a bass player, Nicks son Ryan is a bass player.

Mandy is going out with Foz, Foz is the bass player in Deans band The Defs! Lesley isn't a musician but she comes to all our gigs and does all the festivals!! We Love Music!!!

for design, quality, reliability, choice & confidence
nothing comes close

Fast approaching our 20th Anniversary, We've been doing this for a long time now, and that's just making musical instrument cases. We made our name in the making world of surfing and windsurfing equipment.

Surfboards are fragile and PR surfboard bags are still travelling the world to this day. The design of our cases are exact same specifications from the exact same materials, "if it ain't broke, don't fix it". Of course we have made refinements and improvements as you'd expect. Unbreakable zips, cool silicone badges & luggage tags, waterproof backings, comfortable handles, all designed to make your life on the road that much easier. Effortless transportation & maximum protection!!

Getting you there since 94

When it comes to construction of our drum cases there is no compromise in material quality. A lot of thought, experience and rigorous testing goes into every case. From concept to design to production can take up to 18months and every case is put through it's paces by Team Protection Racket. By the time it's reached the shops we have 100% confidence in it's performance.

Every possible size is available for any combination of drum kit, with ease of use at the forefront of their design. Easy storage at gigs, super quick pack up time at the end, and a safe journey home, even if you are a bit worse for wear, you can be confident your drums won't be!! Heavy-duty zips, buckles and fabrics come as standard on all Protection Racket drum cases, from our largest bass drum case to our smallest stick bag. You'll also find a host of details designed to help you get your gear where you're going as effortlessly and comfortably as possible. Details like padded handles, ergonomically shaped, non-slip shoulder straps, smooth running wheels, internal straps and always plenty of protection, right where you need it.

“ Nothing comes close ”

One Piece Construction: effortless to use no need to muck about with lids buckles and straps. No buckles to break no straps to break. **The Stitching Thread:** Bonded nylon that doesn't deteriorate and holds the case together even if an area of stitching is breached. **Double Stitching:** To first complete the wall and two ends separately and then to join them together giving twice the security at the corners and edges for greater protection and durability. **The Webbing Handles & Seams:** 1,500 kilo breaking strength giving enormous load carrying capacity. **Handles Vertically Mounted on Seam:** Both handle and seam are doubly secure by the former being stitched to the seam's 1,500 kilo breaking strength webbing, rather than to the body of the case. **Zips:** Heavy duty nylon spiral chain, indestructible, waterproof, rot proof!

Here's what's going on inside and outside of every Protection Racket case:

Racketex

high abrasion resistance 600 denier polyester It won't fade, crack or shrink. 100% waterproof high stability in extreme climatic conditions.

Propadd

Superior dual density foam hard on the outside and soft on the inside, giving incredible strength & rigidity whilst keeping the cases very light. The characteristics deflect and dissipate impact forces so that none of the shock passes to the instrument in transit.

Propile

A non abrasive, synthetic fleece that removes surface moisture & preserves tonal stability between gigs. Maintains instrument well being & polishes & cleans your drums in transit!!

Zip & Thread

Heavy duty nylon spiral chain, indestructible, waterproof, rot proof! **The Stitching Thread:** Bonded nylon that doesn't deteriorate and holds the case together even if an area of stitching is breached.

Handles

Racketex as per main body of case, Lined with soft neoprene for comfort. The Underside of handle has polyprop for rigidity lined with 5mm foam. This is our first choice handle on all drum & percussion cases.

Ergo handles

Ergonomic rubber handles are used on the ends of our hardware cases with wheels. Super strong with pre-shaped easy grip for fully loaded cases that carry that bit of extra weight.

Webbing

1,500 kilo breaking strength giving enormous load carrying capacity.

Triple A-Plex Rocket Foam

Triple A-Plex Rocket Foam is a Closed-cell foam and has a calculated degree of hardness, determined by its density. It is strong enough to walk on without major distortion. It is strong and fairly rigid because the bubbles are strong enough to take a lot of pressure. Laminated either side of our Triple A-Plex polycarbonate frame.

Size labels

It doesn't get any easier than this! Every PR case has size label that shows diameter and depth as a simple & quick to read graphic, shows product code too, perfect!

Buckles

Like ALL materials and components used in the construction of our cases, our buckles are of the highest quality. Designed for ease of use, lightness and toughness.

Luggage tag

So you turn up at a gig and all the drummers are inevitably using Protection Racket! Now you can easily identify your drums with this simple to use luggage tagging system.

Zip Pullies

Satin finished nickel plated steel zip pullies & beautifully finished and embossed with the Protection Racket Man. Inter-locking so you can pad-lock them together for extra security & peace of mind on your travels. Totally rust proof & indestructible

getting you there since 1994

BASS DRUM CASES

All Protection Racket bass drum case internal dimensions will accommodate all fixtures & fittings on your bass drum. We base our measurements on the shell size of the drum and allow for tom arm mount, spurs/legs and drum hoops. So, if you have a 22" x 16" bass drum order our model 1622 - 22" x 16" bass drum case for a perfect fit.

Thanks to Propadd P2 foam Our bass drum cases are semi-rigid and do not collapse when open & empty, this ensures easy entry and exit for your bass drum.

Super light weighing in at @ under 3.5kilos, Protection Racket bass drum cases make for effortless bass drum lifting and transportation!

For a list of available sizes of Bass Drum Cases please refer to the size chart at the back of the brochure.

**Billy Cobham
Drumming Legend**

1616 - 16" x 16" bass drum case

with front accessory zipped pocket

Hey PR, just want to say your cases are so damn good!! I was in a motor-way car crash with a truck a few days ago and my cymbal case was launched out the window in mid crash. After staggering out of the totalled car my band mates pointed out to me my case about 50 yards away after collecting it and fleeing across the road off the central reservation. I checked my collection of nearly every cymbal under the sun and to my amazement not a single crack /dent had appeared THANK-YOU!!!!!!!

FLOOR TOM CASES

All Protection Racket floor tom cases are available in RIMS sizes. So if your floor tom is fitted with any style of suspension mounting system, simply add an R to the model number you are ordering and you will receive a RIMS size case to fit your floor tom.

Please note that you will have to remove all three legs on your floor tom for easy entry and exit into your floor tom case. Please check out our range of hardware cases where you will find a variety of sizes to accommodate your hardware.

For a list of available sizes of Floor Tom Cases please refer to the size chart at the back of the brochure.

everybody knows someone who looks like "The Man"

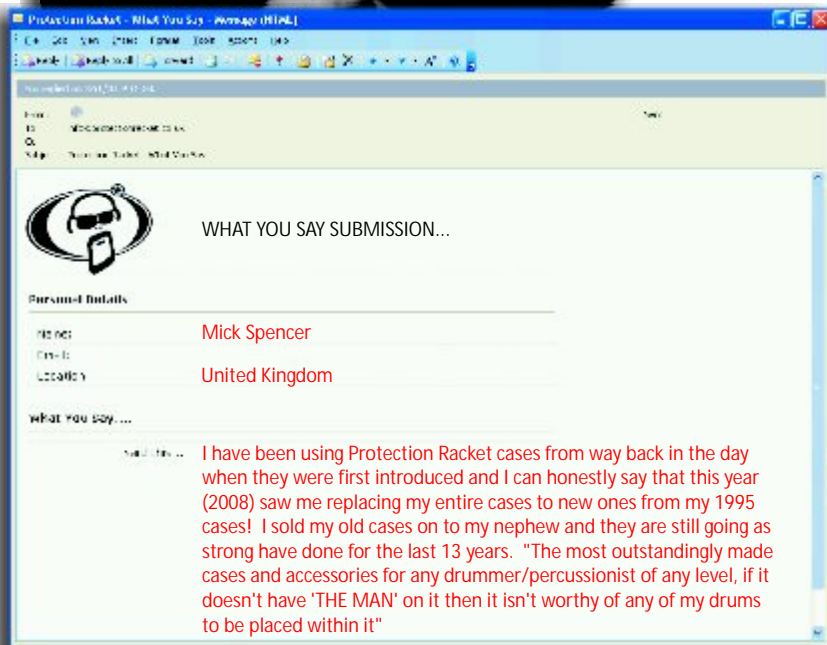

2016 - 16" x 16" floor tom case

Lee Barratt

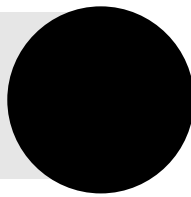

gallons

I have been using Protection Racket cases from way back in the day when they were first introduced and I can honestly say that this year (2008) saw me replacing my entire cases to new ones from my 1995 cases! I sold my old cases on to my nephew and they are still going as strong have done for the last 13 years. "The most outstandingly made cases and accessories for any drummer/percussionist of any level, if it doesn't have 'THE MAN' on it then it isn't worthy of any of my drums to be placed within it"

getting you there since 1994

SNARE DRUM CASES

10 sizes are currently available in our snare case range, we think we've all them all covered! our snare cases are available as standard with carrying handle and also in ruck sack strap and concealed shoulder strap on some sizes.

Our 3006 14" x 6½" and 3011 - 14" x 5½" models are now available in colours; Aero Brown, Funky Green and Steel Grey.

ruck sack straps and concealed shoulder straps available on some sizes, check size chart for details

These are absolutely awesome. My drum rep told me these were the best cases out there and as soon as they came in I understood just why. They're beasts! Whether I'm packing them around in a trailer, the back of a truck, or in my car, I trust that I won't get a scratch on my drums thanks to these! Andrew - USA

getting you there since 1994

TOM CASES

Fast toms, power toms, standard toms, RIMS, we've got a case to suit all your configurations. If you have a tom fitted with a suspension mounting system, simply add an R to the model number of the tom case you are ordering to receive a case with an extra 1½" across the internal diameter to accommodate your RIMS mount. Please note that Yamaha Y.E.S.S & DW mounts (post 2003) do not require RIMS size cases.

If you are in any doubt about whether you require RIMS or Non-RIMS size, simply take a tape measure to your tom and measure the distance between the shell and tom arm mount. If the distance is over .75" you will need RIMS size cases.

HARDWARE CASES

Designed wide and not too high for even distribution of your hardware. Coffin style opening for ease of use. Two webbing handles at either end to make lifting into vehicle nice & easy. Each case can accommodate up to 12 x cymbal stands. The 47" will accommodate most rack systems.

PLEASE NOTE OUR HARDWARE CASES DO NOT HAVE PROPILE FLEECE LINING, WE LINE THEM WITH RACKETEX FOR EXTRA PROTECTION.

5036 - 38" x 16" x 10" hardware case

Often requested for those of you that have a special piece of hardware you wanna keep safe and snug, the 42" will do the job for you as requested! The 42 is ALSO perfect for Mic stands and will comfortably transport 3 Mic stands in one case. Internal straps ensure the stands won't move around in transit.

- 5028 28" x 16" x 10" standard hardware bag
- 5036 36" x 16" x 10" standard hardware bag
- 5047 47" x 16" x 10" standard hardware bag

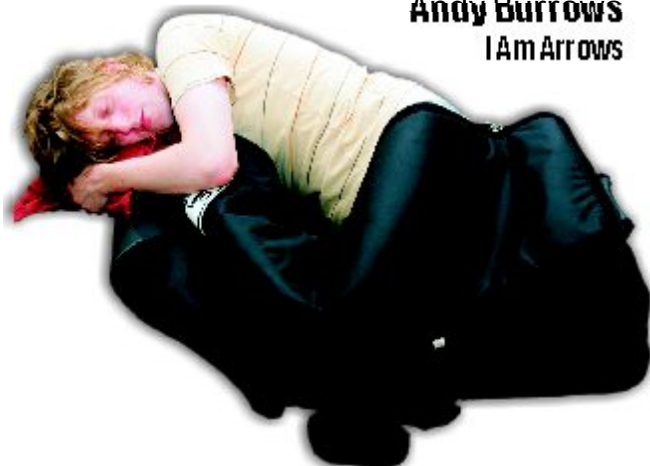

5031 - 42" x 5½" x 5½" hardware case

internal straps on every hardware case ensure hardware remains held down in transit

HARDWARE CASES WHEELS

Coffin style opening for ease of use. Two ergonomic rubber handles at either end to make lifting into vehicle nice & easy. Poly-prop runs up both ends and down the base of the case for strength & rigidity, complimented with plastic runners which run the length of the base for even more protection.

Heavy duty side fitted wheels ensure smooth & effortless transportation. No speed wobble! A 19" x 7" x 2" zipped pocket comes as standard on all sizes. Each case can accommodate up to 12 x cymbal stands.

SIDE FITTED WHEEL UNITS

IMPORTANT SERVICE ANNOUNCEMENT

"The wheels on this hardware case are not designed as shock absorbers, and just like Daleks, they don't do stairs or kerbs, grinds, rail slides, ollies's, 360's or bunny hops..... we are working on it!"

- 5028W 28" x 12" x 12" hardware bag Wheels - Perfect if you have a small set up.
- 5038W 38" x 13" x 13" hardware bag Wheels - Our most popular sized hardware case.
- 5047W 47" x 14" x 14" hardware bag Wheels - For drums set up on a rack system.

As a percussion & drums sales consultant, I confidently recommend Protection Racket cases to all my customers. I own a Protection Racket hardware bag and still believe it's one of the best purchases I've ever made. They are simply the best cases on top of the range gear or well loved gear, it all needs protecting and Protection Racket does the job better than any other!

Thanks! Pat

ELECTRONIC DRUM KIT CASES

Our electronic kit cases have a very simple but effective internal dividing system that is totally adjustable to meet your requirements. The "snaking" divider is attached to the inside of the case via velcro and can create up to 10 compartments.

Please note that you will require a separate hardware case to transport the rack. Like acoustic drums, we believe it's good practise to separate your drums from your hardware.

ELECTRO 1 & 2

Our Electro 1 & 2 hardware cases will transport HD/TO 1, 3, 4, 6, 8, 9, 10, 12 & 20 & Yamaha DTX electro drums

The Electro 1 is 28" long x 16" high and 16" wide.
The Electro 2 is 36" long x 16" high and 16" wide.

You may require 2 x cases to transport your kit complete depending on the configuration of your set up

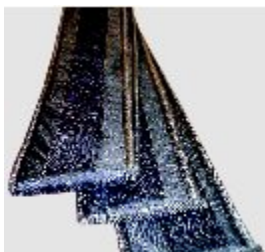

Being a drum/percussion retailer, I need to recommend stuff that a) works for my customers b) works for ME and c) won't blow our bank accounts. Protection Racket covers a, b, and c to a TEE. Fantastic gear, it's the reason they sell. And we sell LOTS. Keep up the good work.

Thanks Ethan - Canada

GYMBAL CASES

DELUXE

I know we are going to be biased, but this is without a doubt the best cymbal case you will ever own! Up to 24" in the main case & up to 15" hi-hats in the outer pocket.

Deluxe cymbal cases are available in 22" & 24" models. Both sizes come with padded carrying handle and shoulder strap as standard. A Ruck Sack model is available in both sizes. Available in all 4 Colours. Black, Aero Brown, Steel Grey & Funky Green.

aero
brown

steel
grey

Beautifully constructed padded rucksack straps. On the 6021RS if you prefer to carry across your back rather than over the shoulder. each strap filled with 5mm pe foam in 5 sections for bendability and comfort. Extra strength given by each strap being over stitched with 30mm binding tape. Both straps are fully adjustable.

The base of the case has a 12" poly-prop protector sewn between the outer Racketex & inner Propadd. This guarantees that your cymbals will not go through the base however much weight is contained inside.

Both the inner & outer compartments have removable Propile dividers to separate your cymbals. Both compartments will hold and divide 4 cymbals. Up to 24" in the main case & up to 15" hi-hats in the outer pocket. So 4 cymbals in each compartment & 2 either side = total of 6 cymbals in each compartment.

Hi Dean, I've been gigging for 20 years and believe me when I say, these are the best gig bags both in quality and durability and master craftsmanship. I've turned so many drummers onto them on the Pearl drum forum and other drummers I've come in contact with while gigging. I wouldn't own any other gig bag, they are that good.

Sincerely, AI USA

NUTCASE

ENTRY LEVEL CASES

Nutcases are quite simply light years ahead of the competition in this highly competitive entry level market. 2 tone in colour, 15mm foam, ergonomic rubber handles and a revolutionary lid closing system with no zip!!

Super cool Grey & Black 2 tone Finish and of course sporting the distinctive Protection Racket logo. If you are in the market for entry level cases this year, you'd be crazy not to check out Nutcases.

Super light yet super strong you will not find a better constructed entry level drum case. Years of drum case making experience have gone into making these cases the best there is. We are proud to put the Protection Racket logo on our first ever entry level cases. 100% Racketex outer fabric, the exact same material as used on our Proline cases. Nutcases are available to buy in sets of as single cases.

Choose from over 14 sizes

Since I've wrapped my Kit in Protection Racket, they've been thrown from vehicle to plane to train to stage without a scratch!

AAA access all area

A new range of Rigid Cases from Protection Racket

Life on the road is tough... and your gear needs the best protection from the rough and tumble that all drums are subjected to. From knocks and dints, and falls and spills, drum cases are the answer to keeping your drums safe. We're not just talking any case... this is the best case ever offered by Protection Racket!

Introducing The Triple AAA (Access All Area – All Accidents Averted) Drum Case Range... super tough, Poly-Carbonate frame cases with all the benefits of Protection Rackets unique drum case technologies.

Triple A-Plex Rocket Foam

Utilising strong, lightweight advanced polymers, Protection Racket have created Triple A-Plex™, a Poly-Carbonate frame which offers exceptional resistance to impact. This forms the core of our new AAA drum cases, around which we have added our tried and tested inner and outer drum case components. This combination of materials has formed Protection Rackets newest material; Rocket Foam™!

AAA access all area

A new range of Rigid Cases from Protection Racket

we get you there

Simon Edgoose...

...at the Namm Show proving just how rigid these cases are by standing on them

Triple A-Plex Rocket Foam

Rocket Foam™ is the combined use of the new Triple A-Plex™ poly-carbonate frame, lined on the inside with 10mm and outside with 5mm closed cell foam of the frame. It really sets the new AAA range apart from the competition. The inner walls have PR's Propile™ technical fleece lining, keeping your drums snug, safe and warm, and the outer of the cases are finished in Protection Racket's tried and tested 600 denier polyester Racketex™, 100% waterproof and extra durable. Finishing touches include new polyester/plastic/neoprene ergonomic handle for extra comfort and longevity and the heavy duty spiral chain zips are double stitched in and totally water and rot proof. Incredibly light, these cases still weigh much less than the average 2-piece hard case and are so strong you can stand on them. The perfect combination of hard and soft....

- 7051 Bass
- 7052 Classical
- 7053 Acoustic
- 7054 Acoustic Bass

Classic guitar case **open**

ROCKET FOAM is a Closed-cell foam and has a calculated degree of hardness, determined by its density and chosen by us, at the design stage of our guitar cases. ROCKET FOAM density is between 60- 65 kgs/m³. It is strong enough to walk on without

major distortion. Most of the cells or bubbles in ROCKET FOAM are not broken; they resemble inflated balloons or soccer balls, piled together in a compact configuration.

This makes ROCKET FOAM strong and fairly rigid because the bubbles are strong enough to take a lot of pressure, like the inflated tyres that hold up an automobile. The cells are full of a special gas, selected to make the protective value of ROCKET FOAM as high as possible, without gaining weight.

Deluxe guitar case **open**

"What's the Difference Between ROCKET FOAM and other "Soft Hollow Internal Type" (or "S.H.I.T.") foams.....?" $P = \frac{M}{V}$

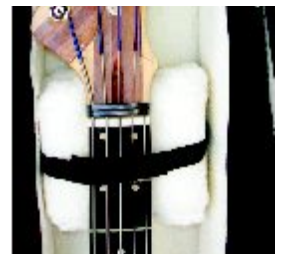

S.H.I.T. foams are mainly open-cell in their chemical structure. They are soft - like a cushion or some packaging materials. The cell walls, or surfaces of the bubbles in this foam are broken and air fills all of the spaces in the material. S.H.I.T. foam is soft and weak, as if it were made of broken balloons or soft toy rubber balls. The density of these S.H.I.T. foams are around 15- 20 kgs/m3.

The core advantages of ROCKET FOAM over open -cell S.H.I.T. foams are its superior protective (P) value. This (P) value represents its Strength, and most importantly, it's ability to ABSORB shock. With a higher (P) value, your instrument has the safest and best Protection available. The choice of ROCKET FOAM in Protection Racket guitar cases is based on the necessary requirements for a guitar case that is light, but offers superior protection....
