remo.com

As the world's leading drumhead specialist, REMO®, Inc. has developed an incredibly wide variety of drumheads. Not only is a full selection available to meet the diverse needs of contemporary drumset players, REMO® heads also bring advanced technologies and exceptional performance capabilities to the specialized needs of players in the marching, concert, and world percussion areas.

Through the development of different drumhead designs, REMO® has been highly successful in refining and improving drumhead performance. In general, drumhead performance can be put into three main categories: **sound** (tone, color, pitch, sustain), **feel** (response, sensitivity) and **presence** (durability, tuning range).

REMO® drumset drumhead types currently include; Clear, Coated, Smooth White™, Suede®, Renaissance®, Ebony®, and Fiberskyn® 3. REMO® World Percussion drumhead types currently include; Fiberskyn® 3 and Nusky®. REMO® also has a variety of drumheads for Marching, Orchestral, and specialty applications. Each type, style and variety of head has its own tone, sustain and durability as rated in the performance profiles accompanying each head.

To further enhance performance levels, REMO® has also developed a variety of collar and hoop designs that provide optimum head response and vibration as well as easier mounting and tuning. These designs include curved, flat and low, medium, and high straight and angled collars as well as the proven technology of the original WeatherKing™.

REMO® advances, coupled with REMO®'s commitment to serving the worldwide drumming community, have vastly improved the quality, consistency and variety of available drumheads. This is why most of the world's top drumset manufacturers and most of the world's top drummers use REMO® drumheads. No wonder REMO® drumheads are found on more recordings than any other drumhead.

The World's Most Recorded Drumheads

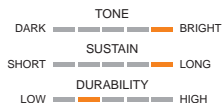

For additional information on REMO®, drumhead types, weights, collars and hoops, please see your REMO® quality retailer or visit remo.com.

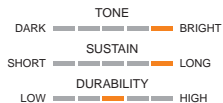

Clear Diplomat®, Ambassador®, Emperor®

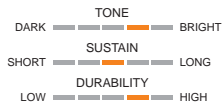

BD-0314-00

BA-0314-00

BE-0314-00

◀ Diplomat®

REMO®'s brightest, most open sounding head due to its single layer of 7.5-mil Mylar® film. They're known for their bright tones, resonance, and sustain and as resonant (bottom) heads opening up the sound of tom-toms. Also available in 2-mil Snare Side Heads for accentuated snare response.

Coated Diplomat®, Ambassador®, Emperor®

BD-0114-00

◀ Diplomat®

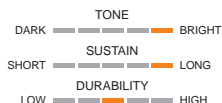

The **Coated Diplomat®** is slightly warmer than the **Clear Diplomat®** due to a coated single layer of 7.5-mil Mylar® film. They're known for their bright warm tones, resonance, and sustain. **Coated Diplomat®** heads are best known for accentuating snare drum response.

BA-0114-00

◀ Ambassador®

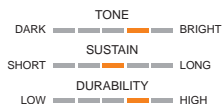

The **Coated Ambassador®** heads are medium-weight heads made with a coated single-ply 10-mil Mylar® film to produce a warm open, bright, and resonant sound with a warm attack. **Coated Ambassador®** heads are the standard of the industry for both live and recording situations.

BE-0114-00

◀ Emperor®

Coated Emperor® heads are warmer and more durable than **Clear Emperor®**s. They're made with two free-floating plies of 7-mil Mylar® film, which gives consistent open warm tones which accounts for their popularity among many of today's Studio, Pop, R&B and Rock drummers.

Emperor X™ Coated

BX-0114-10

Emperor X™

The **Emperor X™** drumheads are the most durable Mylar® heads in the world. They're made with two free-floating plies of 10-mil Mylar® film with a 5-mil reverse black dot, which gives consistent focused warm tones which accounts for their popularity among many of today's hardest hitting Rock drummers.

SNARE BATTER

Model No.	Size
BX-0110-10	10"
BX-0112-10	12"
BX-0113-10	13"
BX-0114-10	14"

The **EMPEROR X™** is the thickest snare head ever made by REMO®. It was changed into a production item after more and more artists began ordering them as custom heads. Mike Fasano (Warrant) who was the first to create the buzz about the new 20-mil head, loved the idea of a "snare head with this much attitude". He in turn got John Tempesta (Rob Zombie) and Matt Sorum (Velvet Revolver), Tre Cool (Green Day) and Travis Barker (The Transplants) hooked on the new head too, and the list continues to grow.

Marketing efforts have fueled the demand in stores and made this one of our best introduced heads ever. For hard hitters, you'll love the sound and durability.

Ebony® Ambassador® Powerstroke® 3, Powerstroke® 4, P3 Pre-Cut Hole

ES-1022-00

◀ Ambassador®

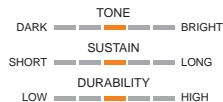

The **Ebony® Ambassador®** heads are medium-weight heads made with a single ply 10-mil Mylar® film to produce an open, warm and resonant sound with plenty of attack. **Ebony® Ambassador®** heads are ideal for batter and resonant heads for tom toms and are known as the standard of the industry for front bass heads.

P3-1022-ES

◀ Powerstroke® 3

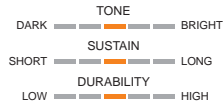

The **Ebony® Powerstroke® 3** features a single ply 10-mil Mylar® with a 10-mil underlay at the outer edge of the head to subtly dampen unwanted overtones. **Ebony® P3** heads are best known for use as a resonant bass drum head. This creates perfect balance of mid and low tones that has quickly made **Ebony® Powerstroke® 3** one of REMO®'s most preferred resonant bass drumheads.

P3-1022-ES-DM

◀ P3 w/Pre-Cut Hole

The **Ebony® Powerstroke® 3** features a single ply 10-mil Mylar® with a 10-mil underlay at the outer edge of the head to subtly dampen unwanted overtones. It comes available with a DynamO reinforced pre-cut 5" hole in the front for air release and miking situations.

Thin

The **Fiberskyn® 3 Thins** have bright tones due to a poly-spun fiber single layer of 5-mil Mylar® film. They're known for their warm bright tones, resonance, and sustain.

The **Fiberskyn® 3** surface is excellent for sticks, mallets and brushes.

Pinstripe® Clear, Coated, Ebony®

PS-0314-00

Clear

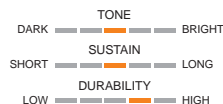

Clear Pinstripe® heads are made with two 7-mil Mylar® plies, and have quick decay, making them ideal heads for the “fat” sounds of Pop, Rock and R&B and for those who want a low pitched sound with moderate attack and response characteristics.

PS-0114-00

Coated

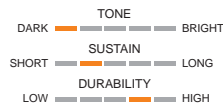

Coated Pinstripe® heads are made with two 7-mil Mylar® plies, and have quick decay, making them ideal heads for the “fat” sounds of Pop, Rock and R&B and for those who want a low pitched sound with warm attack and response characteristics.

ES-0614-PS

Ebony®

The **Ebony® Pinstripe®** heads are made with two (10- & 5-mil) Mylar® plies with a measured layer of a ring reducing agent applied between them at the outer edge of their trademark stripe to dampen high frequency overtones for warm resonance. **Ebony® Pinstripe®**s quick decay makes them ideal heads for the “fat” sounds of Rock and R&B and for those who want more low end sounds with moderate attack and response characteristics.

Powerstroke® 3 Clear, Coated, Smooth White™

Snare/tom-tom: 10-mil Mylar® with a 3-mil Mylar® underlay
 Bass: 10-mil Mylar® with a 10-mil Mylar® underlay

Clear ▶

The **Clear Powerstroke® 3** features a thin underlay at the outer edge of the head to subtly dampen unwanted overtones. This creates a near-perfect balance of response and tone control that has quickly made **Powerstroke® 3** one of REMO®'s most preferred drumheads.

Snare Side

Diplomat®, Ambassador®, Emperor®

◀ Diplomat®

The **Hazy Diplomat®** is a single ply of 2-mil Mylar® designed as the perfect resonant head for snare drums. They're known for their bright warm tones, resonance, and sustain. **Hazy Diplomat®** heads accentuate snare drum response and give a classic look to snare drums.

SD-0114-00

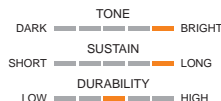

◀ Ambassador®

The **Hazy Ambassador®** heads are medium-weight heads made with a single-ply 3-mil Mylar® film to produce an open, bright, and resonant sound with plenty of attack. **Hazy Ambassador®** heads accentuate snare drum response and give a classic look to snare drums.

SA-0114-00

◀ Emperor®

Hazy Emperor® heads are a single ply 5-mil Mylar® that are the darkest sounding and most durable of the classic hazy series. Designed to provide clean snare response and provide a classic look.

Crimplock™ heads feature a profiled hoop design which provides better tuning capability at higher tensions. The outer edge of the hoop is profiled over the glue channel, creating rigidity and higher strength. These heads are typically found in drum corps, pipe band and marching applications. **WeatherKing®** open channel hoops are ideal for most playing situations where the drumhead is free to stretch and vibrate in relation to a wide range of playing styles and tunings.

ES-1822-MP

Ebony® Suede®

TC-2200-LS

TC-2200-LA

TC - Clear/Hazy

For timpanists looking for great projection, with a bright, clear, focused sound. These heads are available with a choice of steel or aluminum insert rings for greater tuning consistency and reliability.

To order a TC- or RC- Tympani, choose from these selections:

-RA Aluminum Insert / Hazy Film **-RS Aluminum Insert / Clear Film**
Low Aluminum insert rings accommodated early hand screw drums allowing the tuning handle to reach the receiver. The aluminum insert corrected the rusting that occurred over time from the raw steel insert rings as supplied by some early Tympani drums.

-SA Steel Insert / Hazy Film **-SS Steel Insert / Clear Film**
Original high Steel insert rings were developed by Claude Duff and Lloyd McCausland. They offer more rigidity and strength to the flesh hoop and produce 40% more sound from the drum.

-LA Low-Profile Steel / Hazy Film **-LS Low-Profile Steel / Clear Film**
Low Steel insert rings are the latest improvement accommodating all models of Tympani drums. They are twice as thick offering more rigidity and strength to the flesh hoop and making it easier to tune the drum - leveling it off as well as improving the projection. This low steel insert ring is anodized preventing any rust for the life of the head.

RC-2200-LS

RC-2200-LA

RC - Clear/Hazy

Renaissance® tympani heads boast a warm, dark, focused sound with full-range projection. Combining the look and feel of calfskin with superb tonality and consistency, **Renaissance®** tympani heads are excellent for all symphony, opera, concert and orchestral applications. Available with low-profile steel or aluminum insert rings, or high profile steel insert rings.

Nuskyn[®] Crimplock[™], Mondo[™], Tucked, WeatherKing[®]

Featured Artists

Kevin Ricard

Poncho Sanchez

Michito Sanchez

Luis Conte

◀ Crimplock[™]

Crimplock[™] World Percussion drumheads are Type 4 conga heads. They feature a high collar, glued **WeatherKing[®]** style **Nuskyn[®]** or **Fiberskyn[®]** 3 head with an angled crown and a **Crimplock[™]** aluminum support rim (flesh hoop). **Crimplock[™]** is a process that folds the aluminum channel over the top, closing the open channel flesh hoop for added durability.

◀ Mondo[™]

A **Mondo[™]** drumhead features a straight-wall **Acousticon[®]** construction. **Mondo[™]** heads are available in varying degrees of thickness from lightweight (resembling goat skin) to heavy (resembling mule or cowhide). Unlike animal skin, these heads are weather resistant and easier to play.

▶ Stitched

Type 10 heads use **Nuskyn[®]** and are for rope-tuned Shime Daiko and Okedo Daiko drums. These non-collared heads are made by wrapping the film around a steel ring (3/8" for the Shime and 1/2" for the Okedo) with two rows of stitching, capturing the ring inside.

Type 11 heads use **Nuskyn[®]** and are made for REMO[®]'s tunable Nagado drums utilizing REMO[®]'s Tucked drumhead technology around a 1/2" steel ring.

Nuskyn[®] is a major breakthrough in drumhead technology. Frequency analysis shows it closely resembles the performance of animal skin, while actually expanding the sound response spectrum dramatically. **Nuskyn[®]** sounds natural, warm, and full-bodied with enhanced low and mid-range frequencies, without any lingering high pitched overtones.

- Quick decay of overtones
- Sounds, looks & feels like animal skin
- Warm rich tone
- Weather resistant
- Easy to tune

▶ Tucked

REMO[®]'s tucked drumheads technology is a process in which the film is wrapped around a steel insert ring just as animal skins are "tucked" around flesh hoops. The results? REMO[®] has created a more durable drumhead that can withstand the extreme amounts of tension that are needed for many world percussion instruments. Currently available as Type 7 conga, Type 8 djembe, and Type 9 bongo drumheads.

WeatherKing[®] ▶

WeatherKing[®] world percussion drumheads rely on the same open channel system that has established the drum-set heads as the benchmark since 1957. **WeatherKing[®]** Type 6 & 5 drumheads feature a medium height straight collar with an aluminum hoop around the bottom for use with traditional and curved counter hoops.

◀ Crimplock™

Crimplock™ World Percussion drumheads are Type 4 conga heads. They feature a high collar, glued **WeatherKing®** style **Fiberskyn® 3** head with an angled crown and a **Crimplock™** aluminum support rim (flesh hoop). **Crimplock™** is a process that folds the aluminum channel over the top, closing the open channel flesh hoop for added durability.

◀ Mondo™

A **Mondo™** drumhead is defined by its construction style. These heads feature a straight-wall **Acousticon®** construction. **Mondo™** heads are stronger, more durable and available in varying degrees of thickness from lightweight (resembling goat skin) to heavy (resembling mule or cowhide). Unlike animal skin, these heads are resilient to variations in weather and climate, making them easy to tune and play in any condition. **Mondo™ Fiberskyn® 3** drumheads provide superb, authentic drum sound when used on world percussion instruments.

Mondo™ types

Mondo™ Type 1 heads are made with Fiberskyn® 3 and fit REMO®'s Djun-Djuns, Gathering drums, and Arthur Hull's Nesting drums. These heads feature a straight-wall **Acousticon®** construction in order to easily fit larger drums. Type 1 heads are pretuned and designed with a thumb-sized notch on each side so they can also be used independently as hand drums.

Mondo™ Type 2 heads come in either Nuskyn® or Fiberskyn® 3 for different instruments. Both heads come with a high collar and utilize a straight-wall **Acousticon®**

Fiberskyn® 3 provides a superb, authentic drum sound for maximum projection, and is easy on your hands. They are the world's most widely recorded synthetic world percussion drumheads and are used by most top professional drummers in the world.

- Lively overtones
- Fast action
- Easy to play
- Weather resistant
- Easy to tune

▶ Tucked ▶

REMO®'s tucked drumhead technology is a process in which the film is wrapped around a steel insert ring just as animal skins are "tucked" around flesh hoops. The results? About non-standard drum sizes: Unlike drumset counterhoops, you will encounter various dimensions on congas and bongos. These counterhoops have not been standardized. Therefore, counterhoops made by different manufacturers may have a loose or tighter fit with REMO® drumheads. *A tight fit may exist between the outside dimension of the drumhead and an undersize counterhoop.
