

SOUSAPOWER

HS-SERIES SOUND ENERGY FOR THE 21st CENTURY WORLD LEADING HEAVY-SHELL TECHNOLOGY

Robert Tucci Heavy-Shell mouthpieces offer substantial stability in high-volume performance environments. Shell weights, throats and backbores are calibrated to assist the player in controlling tonal output. Greater strength in tone production results in more efficiency and therefore superior results with less effort.

For the 32.00mm class we created two new, totally unique mouthpieces. These benefit from a widely accepted width, ideal for medium and medium-large bore instruments, contemporary rims, proven cups and large open backbores combined in our successful heavy-shell designs.

SOUSAPOWER Sound Energy mouthpieces are for ambitious players. Volume is high, with heavy fundamental output. Middle and low register strength and projection are exceptional; both the upper middle and high registers are very solid.

Sound Energy generated by the player is enhanced by these new mouthpieces. They require a firm embouchure to compliment the acoustical impedance generated in the instrument. The results are superior. High output results in efficiency and therefore ease of performance.

These new mouthpieces compliment our Heavy-Shell models RT-48+, RT-50+, RT-83+ and RT-88+, three of which have larger cup diameters.

SOUSAPOWER 3

Medium-depth pear-shaped cup
Rim 8.00mm – Bore 8.65mm

SOUSAPOWER 4

Medium-depth rounded cup
Rim 8.00mm – Bore 8.4mm

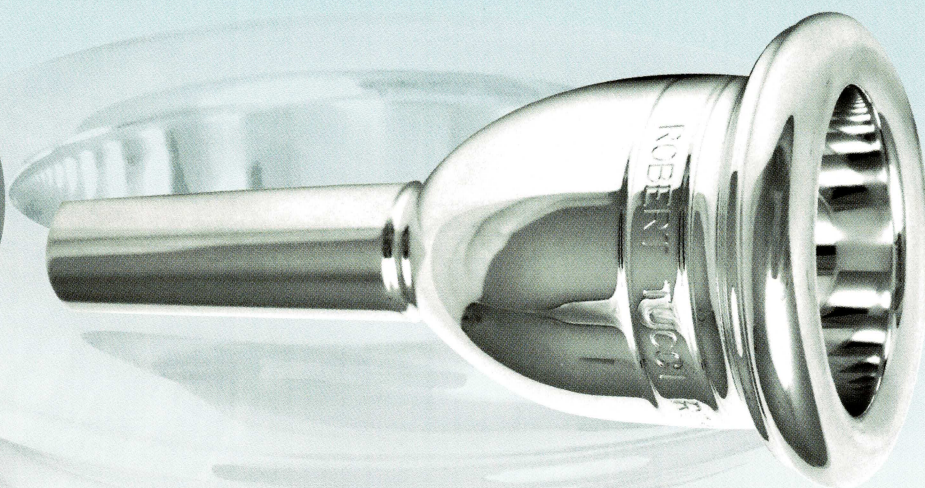

HS-Series:

Models 48+, 50+ and 88+. The most widely-played heavy-shell tuba mouthpieces.

Models 24+ and 83+. Favored by musicians who prefer smaller cup diameters.

SOUSAPOWER 3 - SOUSAPOWER 4 – Standard American Shank

DESIGN PURPOSE

Many models, each designed for a specific purpose. No need to compromise. Choose the Sound Energy mouthpiece which best serve your individual needs.

INNOVATION

Technical leadership. Every new model advances the art, sets new standards for others to reach.

PRIDE OF OWNERSHIP AND VALUE

Sound Energy mouthpieces feature artistic design and workmanship which makes them a joy to behold and use. They provide inspiration to their owners and to those who hear them and give years of superb, reliable performance. Every moment spent playing a Sound Energy mouthpiece has special value to the owner.

COMPATIBILITY

All mouthpieces are based on the same philosophy of sound, response, balance and tonal presence. You are not only investing in a mouthpiece, you are building an efficient and productive system!

PRODUCTION FACILITIES & HUMAN RESOURCES

Sound Energy mouthpieces are built not only to uncompromising musical and technical standards, they are manufactured utilizing state of the art processes developed especially for brass wind mouthpieces.

Our technical staff consists entirely of people who have a strong traditional background in and orientation toward the hand crafting of brass wind products. Decades of experience are reflected and incorporated into all facets of the design and manufacturing process.

HERITAGE

Robert Tucci mouthpieces are a part of the history of brass wind instruments. For over forty years the Robert Tucci name stands for progress and innovation in brass wind design. Your investment in a Robert Tucci product is an investment in the heritage of the brass wind art.

MUSICAL INTEGRITY - HIGH MANUFACTURED QUALITY - THE PROFESSIONAL'S CHOICE
