

YDS-150

DIGITAL SAXOPHONE

YDS-150 DIGITAL SAXOPHONE

The YDS-150 Digital Saxophone is a brand new instrument that brings a new dimension to music making.

With its sax-style mouthpiece, breath sensor, familiar key layout, and integrated brass bell acoustic system, this instrument delivers authentic playability combined with digital possibilities.

The YDS-150 has 73 built in sounds to explore and is accompanied by the free YDS-150 iOS and Android app that gives players the possibility to customise the instrument to their needs.

An immensely versatile instrument, the analogue controller allows players to experiment with new ways of bringing their music to life and the MIDI USB out gives even more creative opportunities for music makers.

You can play along with your favourite music using either the AUX in or Bluetooth audio receiver and switch off from the outside world by plugging in your headphones.
