

Custom Series, Lightweight Eb trumpet, Gold-brass bell, Bell: 127mm (5") , M bore: 11.3mm (0.445"), Finish: Silver-plated, Mouthpiece: 14B4

The 9630 is especially well suited for use in place of B or C trumpets, due to its large sized 5" bell (bigger than the bell of many B trumpets) which gives a broad warm sound. A 4th valve extends the lower range making it possible to play most B and C trumpet parts, and the added weight from the extra valve adds substance to the sound.
