Music makes life better!

LEARNING TO PLAY AN INSTRUMENT AND MAKING MUSIC ARE LIFE-CHANGING THINGS TO DO, ESPECIALLY FOR CHILDREN.

Starting this in early childhood nurtures many things including perception, motor skills and the ability to learn and retain information. Making music also promotes personal confidence and social skills. These are all beneficial well beyond one's childhood years.

NINO® Percussion offers an outstanding collection of musical instruments designed specifically for children. These more than meet the requirements of early childhood music education and are ideal for kindergarten and school programs, or for music therapy and other music-making activities.

It is important to know that NINO® Percussion instruments are not toys. These are the real thing, designed for safety, durability, attractiveness and playability.

Most importantly, they are in tune and musical. In fact, the only difference between NINO® Percussion instruments and those created for adults is their size and colour.

These appealing and pleasing designs are all made in Germany. And because they are of such a high quality and include a wide variety of sound choices, they are extremely popular with young players of all ages (teachers love them too). Yes, whether played alone or within a group, the performance and sound quality of NINO® Percussion instruments make them the ideal choice for young musicians and those who teach them.

...since 1998

music
makes life
better!

Protect the world we live in

At NINO® percussion, it is of utmost importance to ensure that all of our operations are being executed utilizing the highest possible level of environmental care and preservation. When buying a NINO® percussion instrument, you can be sure of this. You have our word.

CO₂ CONSERVATION

For us it goes without saying that all kinds of trash like paper, cardboard, plastic, styrofoam, organic waste, etc. are separated. As a result of this, we are a member of the official German packaging regulations organization which controls the return of the sales, transport and outer packaging that needs to be licensed in a dual system. By this recirculation of paper, cardboard and synthetic materials, we have conserved 449,238 lb (203,771 kg) of CO₂ in 2011. This equals the emission of a car driving 799,132 miles (1,286,078 km).

SAVING ELECTRICITY

To keep our electricity usage at a minimum level, all of the buildings are equipped with motion sensors in order that lights are not left on when our employees aren't there. Additionally, a centralized lighting and machinery control panel prevents the unnecessary waste of electricity.

RENEWABLE ELECTRICITY SYSTEM

All of the electricity used in our facility is produced from renewable energies and comes from water power plants. By doing this we reduce the carbon monoxide emission, which the production of the electricity for our operations would cause if normal energies were used, from 200 tons per year down to zero.

PHOTOVOLTAIC SYSTEM

Since 2003 we have operated our own photovoltaic power plants which have increasingly grown in size to this very day. Today all of our six solar facilities generate a total of 513,000 kilowatt hours of electricity per year. This equals a CO₂ conservation of 565,485 lb (256,500 kg). With this generated energy we are able to supply 170 households with electricity, or cover more than half of our own power consumption.

**PROTECTING THE ENVIRONMENT
IS AN ESSENTIAL PART OF
WHAT DEFINES US AND OUR
DAY TO DAY ACTIVITIES.**

ELECTRIC CAR

With a new e-car we are taking another important step towards an environmentally friendly future. The long-lasting lithium ion battery feeds the electrical driving unit of the e-car and offers eco-friendly driving enjoyment of about 80 km through saved energy.

CHARGING STATION

Refuelling our new e-car is now possible at our on-site charging station. As a special service, visitors to our exhibition hall are allowed to refuel their e-cars for free. Just as with all of the power our company uses, we obtain the energy for the e-car from renewable resources.

AIR HEAT PUMP

All of the exhibition area of our new multipurpose hall gets heated by an air heat pump. The fans lead the outside air through the evaporator of the heat pump where the heat gets absorbed from the air. With the outside air there is always free environmental heat available and that makes it possible for us to abandon gas and heating oil. Additionally air heating pumps reduce pollutant and carbon emissions, are long-lasting, reliable and low-maintenance.

PELLET HEATING

Since 2011 we have heated our new multipurpose hall with a pellet heater. Wood is a natural renewable source of energy which is ecologically commendable and converts the carbon-neutral power of the sun into heating energy. Besides that, wood is almost limitlessly available. Compared to other combustible materials, wood pellets emit the lowest carbon and particulate emissions and have the highest points in terms of energy efficiency.

**MUSIC
BRINGS US
TOGETHER!**

NIN0940B

How to play

Sand Blocks

1. These lightweight sand blocks have two sounds in one – a wood block sound when clapping the pieces and sweeping textures when the inside surfaces are scrubbed together.
2. Keep the beat by clapping together for full wood block sounds.
3. Swipe the inside surfaces together between claps for a fun sweeping sound that adds unique texture to any rhythm.
2. Moving the blocks against each other in any direction draws a rich sound and allows players to find the most comfortable way to find a musical beat.

It's our world, we care for it

ACTIONS SPEAK LOUDER THAN WORDS!

This is why we take our responsibility seriously and commit ourselves to several environmental projects. Our specially developed vacuum distillation saves 90,000 liters of drinking water, the world's most threatened resource. In order to minimize our electricity usage, all of our buildings are equipped with motion sensors and our centralized electricity controls prevents the waste of this resource. With our

solarpower-plant (Photovoltaic-System) we produce enough power to supply 170 houses with electricity. All of the electricity used in our facility is produced from renewable energies. Thus we reduced our carbon monoxide emission from 200 tons per year down to zero. Reusable materials like paper, plastic or styrofoam are too precious to be wasted. We separate them for efficient recycling.

WOOD FROM ENVIRONMENTALLY CONTROLLED WOOD PLANTATION

Thailand is a logical manufacturing base for percussion instruments due to the fact that the *Hevea Brasiliensis*, which was indigenous to Brazil and later transported by way England to Asia, has been commercially grown in Southeast Asia during the last century on plantation farms for the production of Latex. The traditional plantation of Rubber Wood (*Hevea brasiliensis* Muell.-Arg.) meets all ecological requirements.

Same counts for the plantation grown Mahogany Wood from Indonesia, which we use for our Original African Style Rope Tuned Wood Djembes. In a natural evolution, new trees are planted and the older ones, which have ceased to provide latex, are harvested. In this way, plenty of raw material is available and the valuable rainforest eco-system is preserved.

MATERIAL & ECOLOGY

Wood is a raw material which is present in almost every part of our daily life. Trees are an important part of the complex eco-system while healthy forests are imperative for the Earth's atmosphere. Only plantation grown Wood is used for the making of NINO® percussion instruments. This wood fulfils the CITES regulations ("Convention on International Trade in Endangered Species of Wild Fauna and Flora") and originates from environmentally controlled forests from industrial wood plantations.

Hand Percussion

JINGLE STICKS

The NINO® Jingle Sticks feature six pairs of Nickel Silver plated jingles firmly mounted on a plastic frame with a handle. The jingle stick can be played like a tambourine, or like a drumstick on a conga, bongo, or djembe. New and interesting sounds can be achieved with this instrument.

Materials	Jingles: Nickel Silver plated steel Frame: ABS
Features	Ergonomically shaped handle New sound ideas
Colours	BK = Black R = Red Y = Yellow
Age rating	3+

SLEIGH BELL

The NINO® Sleigh Bell produces a true sleigh bell sound. An ergonomic grip assures easy control for kids.

Size	4 bells
Materials	Wooden handle Steel bells
Features	Ergonomic grip True sleigh bell sound
Age rating	3+

RACKET TAMBOURINE

The NINO® Racket Tambourine features a sturdy rattan frame along with a nice sparkling sound. It is available as a one row construction with 9 aluminum jingle pairs. An ergonomically shaped handle makes it perfect for children hands.

WOOD STIRRING DRUMS

NIN0557

WOOD BALL STIRRING DRUM

The NINO® Wood Ball Stirring Drum is a further development of the familiar stirring drum. When playing the drum, a wooden ball fastened to a nylon string strikes the tonally matched wooden tongues and produces a harmonic sound.

Material Rubber Wood (*Hevea brasiliensis* Muell.-Arg.)

Feature Ergonomically shaped handle

Age rating 4+

NIN0556

WOOD STIRRING DRUM

The eight wooden tongues produce different pitches when they are struck separately, like playing a xylophone. By stirring in the drum with the included beater a scale can be played.

Material Rubber Wood (*Hevea brasiliensis* Muell.-Arg.)

Feature Ergonomically shaped handle

Includes Wooden beater

Age rating 3+

How to play

Stirring Drum

1. Drag the included beater around the interior of the stirring drum, striking each of the tongues, creating a melodic stirring sound.
2. Turning both wrists while playing the stirring drum will make it easier to play.
3. Strike the tongues individually with the beater to create unique melodies.

Shakers

SHAKE 'N PLAY

The NINO® Shake'n Play is a sound-based memory game for two to four children ages three years and up, and fun for the entire family. Sixteen identical shakers make eight matched pairs. The object of the game is to find the pairs by remembering the sounds and positions on the board.

SHAKE 'N PLAY

Materials	Plastic shakers Base out of Rubber Wood (<i>Hevea brasiliensis</i> Muell.-Arg.)
Includes	16 shakers (8 pairs) Game guide (in 8 languages) Wooden base
Colour	Orange
Age rating	3+

How to play

Shake 'n Play

1. Place all the pieces on the board photo side down.
2. Players take turns shaking the pieces trying to find a pair that sounds the same, using the photos on the bottom to confirm they are correct.
3. If a correctly matched pair of shakers is found, then the player may keep the shakers. The player with the most shakers after all the shakers are claimed wins.

SEA DRUMS

The NINO® Sea Drums have hundreds of tiny metal balls enclosed between two clear mylar heads. By holding the drum horizontally and gently rolling it, you create the sounds of the ocean surf.

Sizes	8" (NIN044)
	10" (NIN034)
	12" (NIN035)
	14" (NIN030)
Materials	Rubber Wood (<i>Hevea brasiliensis</i> Muell.-Arg.) Two clear synthetic heads
Feature	Soothing sounds
Age rating	3+ (NIN044)
	5+ (NIN034, NIN035, NIN030)

NIN030

NIN035

How to play

Sea Drums

1. Hold the sea drum horizontally and turn the drum slowly to create the sound of waves flowing in the sea.
2. Striking the sea drum in a horizontal position will create a crashing waves sound.
3. Holding the drum vertical and striking the heads will create a more traditional drum sound with some added rattle for a variety of interesting effects.

TUNABLE HAND DRUMS WITH GOAT HEAD

The new NINO® Tunable Hand Drums are a great sounding drum in a kid-friendly form with a natural goat skin head. The head is tuned with external lugs, which are polished to remove sharp edges and plated for dependability and style.

Sizes	10" (NIN036) 12" (NIN037)	Features	Countersunk bolt lugs Chrome plated hardware Replaceable hand selected goat head
Materials	Wooden frame Hand selected goat head	Includes	Tuning key
		Age rating	5+

How to play

Tunable Hand Drums

1. Strike the edge of the hand drum to create a long open tone.
2. Strike the center of the hand drum to create a short closed tone.
3. To tune the hand drum use the provided tuning key. To tighten the head, turn wrench clockwise. To loosen the head, turn counterclockwise. Tightening the drum will create a high pitch, causing a brighter sound. Loosening the head will create a low pitch, causing a darker sound.

NIN017B-BK

NIN017Y-BK

NIN017R-BK

How to play

Bongos

1. Traditionally, you play the bongo between your legs with the smaller drum on your left.

A slap tone gets produced by cupping your fingers slightly as you strike the head of the bongo.

2. To create an open tone hit the edge of the bongo with the knuckly part of your palm and let your fingers bounce off the head.

WOOD DJEMBE

WOOD DJEMBE

The Djembe is the most popular African drum. Even first time players are quickly able to draw different tones from this great instrument. The NINO® Wood Djembe has a diameter of 10" and a height of 21" and is the perfect drum for children at school.

Size	10"
	21" tall
Material	Rubber Wood (<i>Hevea brasiliensis</i> Muell.-Arg.)
Features	Hand selected goat head Rounded rim for playing comfort Black powder coated hardware
Includes	Tuning key
Colour	NT = Natural
Age rating	5+

NINO48NT

How to play

Djembes

1. Place the djembe between your legs, crossing your ankles in front of you for support. Keeping your hands relaxed, strike the head of the drum near the edge for strong open and slap tones. Striking the drum in the middle will produce a powerful bass tone.
2. Using those tones, and alternating between your right and left hands, create your own patterns and rhythms.

3. To tune the djembe use the provided tuning wrench. To tighten the head, turn wrench clockwise. To loosen the head, turn counter-clockwise. Tightening the drum will create a high pitch, causing a brighter sound. Loosening the head will create a low pitch, causing a darker sound.

Djembes

ORIGINAL AFRICAN STYLE ROPE TUNED WOOD DJEMBES

Djembes - how we make it

1 Plantation grown Mahogany is the best choice for eco-friendly djembe shells. Here you see selected logs roughed out in preparation.

2 The interior is hollowed out.

3 The djembes are hand-carved. There is no substitute for this level of craftsmanship.

4 The inside of the bowl is hand-carved which tunes and shapes the sound.

5 The bearing edge is crucial. It must be formed to exact specifications.

6 The goatskin head goes on and the tuning ropes are tightened.

Congas
