A glimpse of the TAMA drum factory in Japan

Our skilled craftsmen carefully select the best wood using all their senses.

The essence of our Japanese craftsmen is expressed through STAR Drums.

Much thought and research is concealed within these shapes that leads to the sound of STAR.

The essence of our Japanese craftsmen is expressed through STAR Drums.

Vibrant colors invigorate and inspire the mind.

The essence of our Japanese craftsmen is expressed through STAR Drums.

STAR Drums speak to both our origin and our future.

TAMA STAR BUBINGA

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance.

STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

TAMA STAR WALNUT

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance.

Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. The new STAR Walnut shells project booming low end with enough cut to be heard through any mix.

STARCLASSIC BUBINGA

-Exotic Finishes

Our Starclassic Bubinga offerings now include an Exotic Finish line which feature extraordinarily beautiful exotic wood finishes, in addition to the regular lacquer finishes. Their shells are made slightly thicker than those in our Starclassic Maple series to provide a more aggressive attack, a fuller deep and dark tone, and more powerful resonance.

Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 30 different shell sizes. Starclassic Bubinga also features two shell hardware finishes to choose from: Black nickel or chrome. Starclassic Bubinga is simply an unprecedented combination of sight and sound.

STARCLASSIC MAPLE

-Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for added visual appeal.

STARCLASSIC PERFORMER B/B

-Sparkle Finishes

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it's time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, TAMA has created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

SUPERSTAR CLASSIC

-Maple shell / Lacquer Finish

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70's, while the ingenious Star-Mount system and new thinner gauge 100% maple shells eclipse anything in its class.

Octobans are one of TAMA's first original instruments and have been used by a diverse group of progressive players including Billy Cobham, Simon Phillips, Stewart Copeland, Bill Bruford, Mike Portnoy, and Tim Alexander. Instead of relying on changing drum diameters, the pitch of each Octoban differs according to the length of the drum's shell. The 6" diameter shells can be tuned melodically and are available in low-and-high-pitch sets.
